1. This window will pop up. Make sure you click “HTML” under “Code”.

2 Use this drop down arrow to pick a size. I prefer this medium.

4 Click and highlight to turn the text blue if it isn't already. Then copy this with a ctrl ('control') C (ctrl key is usually in the lower left of the keyboard)

3 Click “HTML” here, also

After our outing, four of us went across the street to La Catrina for lunch. Couldn't resist a very quick sketch.... including one of the sketchers and a robe of chilis.

Choose "from URL & use ctrl V to past the whole link (URL) into the box

Select a file

- Upload
- From this blog
- From Picasa Web Albums
- From your phone
- From your webcam
- From a URL

Paste an image URL here: `</a>`

Now you must edit this link (URL) in the above box by deleting everything before "https" and after ".jpg"

```
<a href="https://www.flickr.com/photos/redharp/16165405397" title="2015 0123 Fran&#x27;s by Kate Buike, on Flickr"></a>
```

The URL is not valid. Make sure it starts with http:// or https://.

Select a file

- Upload
- From this blog
- From Picasa Web Albums
- From your phone
- From your webcam
- From a URL

Paste an image URL here: `https://farm8.staticflickr.com/7523/16165405397_0bb8f05fd0_z.jpg`

Last, click "add selected" and your image will appear in the blog.

Once you do that, the image will show as a preview. If it doesn't you've missed removing part of that link.
